\*\*The Toyota driver and front passenger air bags are a Supplemental Restraint System (SRS) designed to inflate in a severe frontal collision. In all other accidents, seatbelts offer primary protection, and the air bags will not inflate. Do not sit or place objects close to an air bag. To minimize the risk of severe injury or death in all types of crashes, seatbelts must be worn at all times by all vehicle occupants. Do not use a rearward-facing child seat in any front passenger seat. The force of a deploying air bag SRS may cause serious injury or death. For more information on air bags and instructions on child seat usage, see the Owner's Manual.
